Braunschweig, Mai 22, 2020

Dear Prof. Nowak,

we just want to take a moment to thank you for the collaboration in the project entitled *Energy-efficient and environment-friendly integrated CO2 vapour compression units for supermarkets* (acronym: SuperSmart Rack, project no 244009/E20) that has been funded from the Norwegian Research Council. In the project that was implemented in the years 2015-2019, the role of SUT was to update the CFD model to HRM approach, build a reduced ejector model in both transcritical and subcritical modes and investigate heat transfer effects in ejectors. This contribution was instrumental to the whole investigations carried out within the above mentioned research project.

Thank you for your excellent collaboration and publishing the project results in the JCR research papers. I expect that we will have a chance for further fruitful collaboration.

Sincerely,
